BAO CHAU ANH LE

FREDERICTON, NB | 437-677-8769 | LELEBAOCHAUANH@GMAIL.COM | LINKEDIN |

OVERVIEW

- Graduating from the IT: Software Development, embedded system at NBCC,
- Experienced in databases, management, basic system setup and interest in lab technology and robotics.
- Strong desire to work in an IT field, as well as an interest and passion in programming

SKILL

- Languages: Python, C++, C, Java, C#, SQL, Bash, HTML, CSS, JavaScript, Pascal.
- Frameworks & Libraries: React, Node.js
- Hardware & IoT: Routers, Gateways, IoT Sensors, Testing systems.
- Database & Delivery: PostgreSQL/Supabase, MongoDB, Git/GitHub, MySQL, Docker
- Workplace: time management, quick learner, creative.

EXPERIENCE

Research Assistant (summer student):

New Brunswick Community College - Fredericton, NB | *June 2026 – September 2026.*

- Multi-OS Configuration: Installed, configured, and troubleshooted system software across Linux (Ubuntu), Windows, and macOS operating systems, utilizing command-line interfaces (CLI) and Bash scripting.
- Experienced in robots, drones and circuit boards (esp32, Arduino, raspberry pi)
- Familiar with setting up hardware and system.

PROJECT

Mapping tools: view in GitHub

- Built and deployed a full-stack web tool for indoor and outdoor signal coverage mapping, with Supabase authentication and per-user cloud storage secured by row-level security.
- Implemented affine georeferencing to place rotatable floor plans on real GPS coordinates, converting pixel-based indoor measurements into real-world positions.
- Developed a 3D inverse-distance-weighted interpolation with marching-squares isolines, weighting vertical distance to model signal attenuation through concrete floors.

EDUCATION

New Brunswick Community College, Diploma - Information Technology: Software Development 2025 - 2027
